

## SIMPL4ALL: WHERE ARE WE AT?

**The European Erasmus+ project SIMPL4ALL is at its turning point: we are exactly halfway through the process and we can go through the state-of-the-art.**

The eight partners of the SIMPL4ALL project, EnAIP FVG (Italy-Lead Partner), Cuorementelab Impresa Sociale (Italy), Fondazione Progettoautismo fvg (Italy), Instituto de Tecnicas Educativas (Spain), Lebenshilfen Soziale Dienste (Austria), Les Apprimeurs (France), Logopsycom (Belgium) and Zavod Risa (Slovenia) have already met three times in person, in Italy, Slovenia and Spain, and twice online.

The working group created is closer than ever. The products are all being worked on and for some we are even in the final stages. **Here is a brief report on the situation.**  
Here is a brief report on the situation.

### IO1-SIMPLIFIED LANGUAGE INSTRUCTION MANUAL

Responsible: Zavod Risa

The drafting of the Instruction Manual for writing and presenting texts and tools in simplified language is finished. Translations by the project partners are in progress. Only the chapter of recommendations is missing, which will be drafted at the end of the testing of all materials (expected between November 2023 and March 2024). Comparing the different national situations, in terms of regulations, aids and practices, was very interesting. Making a compelling and 'simple for everyone' synthesis was not easy.

### IO2-SIMPL4ALL PEDAGOGICAL TOOLKIT

Responsible: Les Apprimeurs & Logopsycom

The pedagogical toolkit for facilitators is being built using Entrecomp - Entrepreneurship Competence Framework, the framework developed by the European Union to identify and define the key competences necessary for personal development but also for success in entrepreneurship and innovation. For each of the 15 key competences defined by Entrecomp, a teaching unit, an activity and one/two practical tips will be created.

The partners at the Madrid meeting have divided up the 15 competences and the first contents have already been drafted; by the end of the summer, they will be made available on the official [simpl4all.eu](http://simpl4all.eu) website.

### **IO3-PEDAGOGICAL MEDIATION 4ALL INSTRUCTIONS FOR USE**

Responsible: Lebenshilfen Soziale Dienste

Focus groups with "Advocates" are starting, the outcome of which will lead to the drafting of the Quick Guides for Learning Mediators in different contexts: peer education for students, educators/teachers and families. By the end of June, data from the focus groups will be collected, followed by the elaboration of each manual.

### **IO4-VET VIDEO MODELLING 4ALL**

Responsible: Fondazione Progettoautismo fvg & EnAIP FVG

The last output of the project are six video modelling videos on three defined topics: gardening, cooking and office work. This teaching technique can be particularly useful for people who learn best through visual observation rather than only through verbal explanations or written instructions. Videos can provide a clear and concrete model of the actions to be performed, allowing people to see exactly what to do and how to do it. Video modelling is particularly effective in teaching specific skills, fitting perfectly into our VET framework. The scripts have been drafted, casting of actors and location scouting are well underway and pre-production has started. Filming is scheduled for July in order to have them ready for the project managers' meeting in mid-October in Graz (Austria).

We are excited about the progress made so far by SIMPL4ALL and believe that these initiatives will have a positive impact on the lives of many people, fostering more inclusive and accessible communication for all.

We will keep you informed about further developments and results of the SIMPL4ALL project. In the meantime, please do not hesitate to contact us if you have any questions or would like further information.
